GLOBAL SUSTAINABLE MOBILITY PARTNERSHIP

Funded by:

Climate-KIC is supported by the EIT, a body of the European Union

## Project Brief

SuSMo (Sustainable Urban Shared Mobility), funded by EIT Climate-KIC, will work with city partners (Stockholm, Madrid, Bologna and Sofia) to change the way we implement shared mobility systems across Europe and deliver a vision for cities to lead the way in decarbonising our transport systems.

## Objectives

- Establish the needs, concerns and areas of interest of organisations involved in implementing of shared mobility.
- Create best practice guidance and practical tools that cities across Europe will be able to use in their transition to sustainable shared mobility.
- Provide policymakers with the tools and knowledge needed to better implement shared mobility solutions.

## Outcomes and Deliverables

The project will create a community of policy makers, influences and private sector actors who have shared objectives around cleaner, greener, shared transport and engage with key people in the project partner cities and in the shared mobility sector.

Data will be gathered on the transport needs of each city's residents. This information will then be used to develop an online learning programme.

Future plans for the project:

- A workshop in Brussels in November.
- Additional webinars.
- Throughout this year to publish and release of guidance tools to aid cities in shared mobility planning.
- In the Autumn the Sofia led co-creation workshop.
- 2021 testing and refining outputs design to promote sustainable shared mobility with the SuSMo cities.
- Spring next year Bologna led co-creation workshop.
